INFORMATION REPORT

MARCH 12, 2025 SECY-25-0018

FOR: The Commissioners

FROM: Jody C. Martin
Associate Director for Operations
Office of the Executive Director for Operations

SUBJECT: WEEKLY INFORMATION REPORT – WEEK ENDING March 7, 2025

CONTENTS

	Enclosure
Office of the Chief Human Capital Officer	A
Office of the Chief Information Officer	B
Office of Nuclear Reactor Regulation	C
Office of the Secretary	D

Signed by Martin, Jody
on 03/12/25

Jody C. Martin
Associate Director for Operations, OEDO

CONTACT: John R. Jolicoeur, OEDO

Freedom of Information Act (FOIA) and Privacy Act (PA) Requests and Appeals Received During the Period of March 03 – March 07, as submitted by requester.

Tracking Number	Requester's Name	Requester's Organization	Request Description	Received Date
FOIA-2025-000448	McGill, Clinton	-	In accordance with the Freedom of Information Act and the Privacy Act, I am requesting any and all hard copies and/or electronic documentation related to an allegation (Allegation Reference #Unknown), including but not limited to intake forms, emails, affidavits, reports, exhibits, inquiries, and investigations related to named individual conducted by the NRC and NRC's Office of the Chief Human Capital Officer (OCHCO) during the calendar years 2024 through 2025.	03/03/2025
FOIA-2025-000449	Stover, Jeff	FTI Consulting	Pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, we are submitting a request for records within the possession, control, or custody of the U.S. Nuclear Regulatory Commission ("NRC") relating to information regarding the facility located at 1746 Commerce Road, Creston, Iowa 50801. The facility operated under license STB-433 and Docket No. 40-564 issued by the Atomic Energy Commission ("AEC"), NRC's predecessor. The period of interest for the topics outlined in this request is 1964 to the 1986. Companies operating during this period include Hills-McCanna Company, McCannalloy Division, and Wellman Dynamics Corporation.	03/03/2025
FOIA-2025-000450	Buhayar, Noah	Bloomberg News	I request disclosure from the Nuclear Regulatory Commission (NRC) the following documents: 1. Visitor logs for commission member and now chairman David A. Wright. The time period of this request is January 24, 2025, through the date on which the search is conducted. 2. Visitor logs for commission members Annie Caputo, Christopher T. Hanson, Bradley R. Crowell and Matthew J. Marzano. The time period of this request is Nov. 1, 2024, through the date on which the search is conducted.	03/05/2025
FOIA-2025-000451	Green, William	-	All emails from the below list of agents of the NRC sent from February 22, 2025, up to the receipt of this email, with the subject line "RE: What did you do last week?" and the recipient email address of	03/06/2025

Office of Nuclear Reactor Regulation
Items of Interest
Week Ending March 7, 2025

U.S. Nuclear Regulatory Commission (NRC) Released for Public Comment Draft Revision 4 of NUREG-1482, "Guidelines for Inservice Testing at Nuclear Power Plants: Inservice Testing of Pumps and Valves and Inservice Examination and Testing of Dynamic Restraints (Snubbers) at Nuclear Power Plants."

On February 28, 2025, the U.S. Nuclear Regulatory Commission (NRC) released for public comment draft Revision 4 of NUREG-1482, "Guidelines for Inservice Testing at Nuclear Power Plants: Inservice Testing of Pumps and Valves and Inservice Examination and Testing of Dynamic Restraints (Snubbers) at Nuclear Power Plants." This new revision provides updates on developments in inservice testing (IST), including the code of record interval flexibility introduced in the rulemaking amending 10 CFR 50.55a, "Code and standards," (89 *Federal Register* 58039; July 17, 2024). This flexibility expands the code of record interval from 10 years (120 months) to two consecutive IST and inservice inspection (ISI) program intervals. Draft NUREG-1482, Revision 4, is available in the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML24277A142. The NRC staff plans to engage with external stakeholders and solicit public comments to further improve the NUREG.

NRC Staff Signed the "Christopher M. Crane Clean Energy Center / Three Mile Island Nuclear Station, Unit 1, Restart Panel Charter."

On March 4, 2025, the NRC staff signed the "Christopher M. Crane Clean Energy Center / Three Mile Island Nuclear Station, Unit 1, Restart Panel Charter." This charter defines the responsibilities for the Crane Restart Panel, as it relates to inspection and licensing activities until commercial operation resumes. The Crane Restart Panel's primary objective is to proactively identify and promptly resolve any licensing, inspection, or regulatory challenges that concern the restart, and the members are senior management from across the agency.

Office of Nuclear Reactor Regulation (NRR) Conducted a Joint Public Workshop with the Nuclear Energy Institute (NEI) and Other Industry Representatives, Which Offered a Unique Knowledge Management (KM) Opportunity to Share Lessons Learned from the 10 CFR 50.69 Licensing and Oversight Programs.

On March 5, 2025, the Office of Nuclear Reactor Regulation (NRR) conducted a joint public workshop with the Nuclear Energy Institute (NEI) and other industry representatives, which offered a unique knowledge management (KM) opportunity to share lessons learned from the 10 CFR 50.69 licensing and oversight programs. There were approximately 400 attendees, including staff from various offices throughout the agency and industry representatives from various facilities. NRC staff and industry representatives provided shared experiences and lessons learned from the initial development and review of the 10 CFR 50.69 license amendment request, as well as the inspection of the implementation of the 50.69 program following NRC approval. Industry also discussed the safety benefits of adopting this program. The workshop proved to be a success in providing KM to support the expansion and integration of risk information into the staff's decision-making practices for both licensing and oversight activities. Staff, in coordination with industry, will look for future opportunities to continue these KM public workshops.

NRC Held a Public Meeting to Initiate Discussions on Technical Considerations for the Proposed Use of Offsite Meteorological Data as an Alternative to or in Combination with Onsite Meteorological Measurements.

On March 6, 2025, NRC staff held a public meeting to initiate discussions on technical considerations for the proposed use of offsite meteorological data as an alternative to or in combination with onsite meteorological measurements. This meeting was convened as part of the agency's ongoing efforts to update and modernize regulatory guidance as called for in the ADVANCE Act. This topic is of significant interest to the nuclear industry, as applicants for advanced reactors have begun submitting applications that incorporate offsite meteorological data in lieu of data from an onsite monitoring program.
